## Kotkamills' plastic free packaging boards available for fast deliveries in Central Europe

Sustainable, plastic free packaging solutions and their recyclability are today among the most discussed subjects in the packaging industry.

“Kotkamills are proud to present our range of plastic free and easy-to-recycle AEGLE® Folding Boxboard and ISLA® Food Service Boards at FachPack, the European trade fair for packaging, processing and technology. As all of our products are plastic free and produced with water-based dispersion barriers, we want to ensure easy recyclability for brand owners, retailers and consumers alike. The demand for recyclable and sustainable products is increasing. We are proud to be able to offer sustainable and easy-to-recycle solutions to answer this demand.” Kotkamills' CEO **Markku Hämäläinen** states.

In addition to fully coated Folding Boxboard products **AEGLE® Pro** (GC2) and **AEGLE® White** (GC1), Kotkamills' product range includes **AEGLE® Barrier Light** for food-to-go packaging where a medium grease resistance is required and **AEGLE® Barrier Plus** with excellent grease and water vapour resistance for frozen food and bakery applications. **ISLA® Duo** cupstock for disposable cups complements the product family. All the products are easy to recycle after use, without the need to separate any plastics from the wood fibres. Kotkamills' Barrier Board solutions do not contain any fluorochemicals, which various studies have shown can have a negative impact on both our health and the environment.

Kotkamills are happy to announce we have recently commenced a sheet-cutting service in co-operation with **Pyroll Baienfurt**. Folding Boxboard and Food Service Board will be offered with a 2 – 4 week lead-time from date of order and will start in October, and an express delivery service offering with a 3 – 5 days delivery time will be the next step. Pyroll's state-of-the-art service center offers a fully automated warehouse providing high capacity sheeting in conjunction with significant storage possibilities.

“Together with the sheet-cutting service partner in Germany, Kotkamills' personnel at the mill and in our branch office in Hamburg are ready to provide our customers with the best possible service and quick access to our products. Kotkamills' plastic free, easy-to-recycle packaging board solutions are on offer to make a remarkable impact towards a sustainable, game-changing world of packaging.” **Hämäläinen** ends.

Come and meet us in FachPack show in Nürnberg in Hall 5, Booth 5-430 between the 25<sup>th</sup> and 27<sup>th</sup> of September.

Change the game with us!
